MARKETING TECH DEVELOPERS LAB

What is Marketing Tech Dev Lab?

A practical workshop in which Deloitte specialists will show you how to work with the SalesforceMarketing Cloud platform in the field of programming, configuration and project management.

After completing the training, all participants gain the knowledge necessary to start a career inSalesforce Marketing Cloud and a certificate confirming participation.

What is Salesforce Marketing Cloud?

It enables businesses to create data driven, personalised, customer journeys across multiple channels. It leverages one platform so businesses can provide a consistent, cohesive, customer experience across email, social, website, advertising and even in-store. Marketing Cloud Developers are responsible for integrations with external systems (SOAP/REST API). They are also responsible for implementation of custom solutions which enhance native capabilities of the platform. They're also experienced in advanced segmentation (SQL), reporting and analytics, and data configuration. SFMC Developers will also troubleshoot, and support implemented Salesforce applications. Last but not least, they create advanced, personalized, and dynamic messages and landing pages by leveraging Marketing Cloud's scripting languages.
