

Analyst || Frontend/JavaScript Intern

Perfect candidate should be able to demonstrate his skills via github or bitbucket. No professional experience is required, freelance would however be a plus.

Requirements:

- Understanding of JavaScript
- Knowledge of HTML5 & CSS3
- Basic understanding of one of the SPA frameworks: Angular, React, Vue
- Knowledge of Responsive Web Design
- Fluent in English

Nice to have:

- Knowledge of TypeScript
- Familiarity with UX/UI concepts
- Knowledge of testing methodologies
- CMS experience

Your future role:

- Development of Web applications
- Tight cooperation with Senior Developers

Junior Tester / Analyst

We're looking for

- A candidate who will start journey as a member of the test team, to familiarize with Temenos core banking system, methodology, functional requirements and decide in the future to follow either testing or analytical path. Experience of the candidate is not required, we will teach you everything.

Requirements

- Fluent in English, both written and spoken;
- Strong communication and analytical skills;
- Willingness to learn new systems and processes;
- Willingness to travel in the future;
- Basic understanding of information technology, cloud-native and banking solutions.

Nice to have

- Experience in banking industry, business analysis or IT analysis;
- Basic knowledge of testing methodologies;
- Basic knowledge of database design ;
- Knowledge of modelling languages such as UML and BPMN ;
- Experience with SDLC and team cooperation tools (JIRA, HP ALM, Git, Confluence, SharePoint, etc.)
- Experience with Temenos Transact (T24) or any other core banking system.

Your future role

- Starts in test team to learn from our experts the Temenos Transact (T24) core banking system and becomes subject matter expert in chosen domains;
- Participating in all stages of core banking implementation projects (on-premise as well as cloud-native solutions);
- Being continuously attentive to details and maintaining highest quality of project deliverables;

What we offer

- Choice of career path – being a tester or an analyst in IT and banking;
- Practice and solving real business cases;
- Involvement in a variety of tasks than constant work with Excel;
- Getting to know advanced IT solutions rather than listening about them in the lectures;
- Analysing customer needs and providing customized solutions rather than restorative work;
- Opportunity to develop your business, technical and soft skills with additional access to extensive number of trainings;
- Possibility to get valuable core banking and cloud certificates with paid gratification;
- Flexible working hours with possible breaks for studies;
- Work in a dynamic, international business service environment;
- Opportunity to take part in international projects and travel all around the world;
- Excellent work atmosphere.

Java Developer

Requirements

- Minimum one-year, practical experience in working with information systems based on Java, Java EE or Python - we are looking for people with different levels of experience;
- Experience in writing console applications;
- Responsibility and the ability to work in a team;
- Knowledge of the English language sufficient to enable reading and writing technical texts.

Nice to have

- Knowledge of Spring;
- Practical ability to cover code with tests (JUnit);
- Knowledge of: Maven3, Gradle, GIT;
- Knowledge of design patterns;
- Basic knowledge of cloud environments (np. AWS, Azure, Google Cloud, IBM Cloud);
- IT or related education.

Your future role

- Development and maintenance of applications for clients from the financial industry;
- Collaboration with analysts and testers to deliver high-quality software;
- Preparation of technical documentation.

What we offer

- Work in a dynamic, international environment;
- Possibility of 100% remote work;
- Participation in interesting projects for financial institutions;
- Work atmosphere where you can be yourself and freely express your opinions and ideas;
- Opportunity to develop and develop technical skills with the support of experienced company experts;
- Opportunity to participate in valuable training (including certification paths in selected cloud technology).

We're looking for ambitious **Junior Cloud Developers** to join our dynamic Cloud Engineering team at Deloitte to deliver interesting public cloud projects in Poland and abroad: implementation, migration and development of new cloud computing solutions.

What we expect:

- Ideally one-two years of experience as a developer;
- Knowledge of at least one of the following programming languages: Java/C#/Python/Node.js;
- Knowledge of Git Version Control System;
- Basic knowledge of shell scripting (Bash, Powershell)
- Advanced problem-solving skills;
- Experience in cloud computing or iPaaS design/development will be an asset;
- Cloud certifications (e.g. AWS Developer Associate, AWS SA Associate, iPaaS like Mulesoft Certified Developer) will be also an asset;
- Verbal and written communication skills in English;

Your future role

- Developing new software based on such models as Cloud Native on AWS/Azure/GCP or iPaaS solutions (Mulesoft, Dell Boomi, Apigee, WSO2)
- Introducing changes to the existing software;
- Maintaining Cloud/iPaaS solutions
- Developing production environments compatible with a public cloud;
- Working with services from PaaS suppliers.

What we offer (TBC)

- Opportunity to develop innovative multi-cloud projects using the latest technologies.
- Unique culture of the function and the entire organisation focused on growth, interesting projects and mutual trust.
- Latest tools and access to training and mentor support.
- Medical package for you and your family.
